SKILLS

TECHNICAL EXCELLENCE

- Software Design & Development
- Java Microservices
- System Scalability & Reliability
- Cloud (AWS)
- OpEx, DevOps & No-SQL DBs
- Python & AI/ML Integration

PEOPLE LEADERSHIP

- Mentoring & Coaching
- Talent & Team Scaling
- Culture Building
- Employee Engagement

ENGINEERING MANAGEMENT

- Technical Roadmap & Strategy
- Agile Methodologies
- Resource Planning
- Security & Compliance
- Incident Management & RCA

BUSINESS ACUMEN

- Technology Vision & Alignment
- Budget Management
- KPI & OKR Development

CERTIFICATIONS

- Datalake Mastery (Udemy)
- ML Level - 1 (Udemy)
- Java Certified Professional (SCJP)
- Leadership Certification (NIU)

Strategic and results-driven technology leader with 20+ years of experience in building robust software platforms, delivering cutting edge AI/ML solutions, and leading high-performing global engineering teams. Skilled in developing and executing technology roadmaps aligned with business goals, overseeing cloud infrastructure, managing large-scale migrations, and implementing agile and DevOps practices. Passion for building high-performing teams and cultivating a culture of trust, continuous learning, innovation and operational excellence.

WORK EXPERIENCE- 20+ YEARS

Expedia Group
Director of Technology

SEP-2018 - PRESENT Austin, TX

- Led Expedia's Flights Search organization, managing a total of 50 software developers, 5 senior engineering managers and 4 program managers
- Led multiple complex software initiatives from concept to deployment, leveraging machine learning to enhance selection, ranking, caching, and filtering capabilities
- Collaborated with Product, Strategy, UX teams utilizing both creativity and technical skills to design & develop best-in-class customer centric features
- Fostered an environment of innovation, collaboration, and execution while retaining and developing talent through mentorship and continuous feedback

Expedia Group
Sr. Engineering Manager

JUN-2016 - SEP-2018 Chicago, IL

- Led a 20-engineer team to build flight search algorithms, pricing & caching platforms and onboard new supply partners to deliver delightful flight options
- Improved the team's design, development culture including best coding practices
- Promoted the culture of A/B testing, relevance and performance optimization
- Helped team achieved four 9s of system uptime and notable reduction in latency

Orbitz Worldwide
Sr. Technology Lead

MAR-2015 - APR-2016 Chicago, IL

- Evangelized and developed Orbitz's supplier facing software products
- Developed core platform capabilities and exposed them via scalable RESTful APIs
- Built scalable end to end reporting platform using ELK stack
- Advocated for software industry standards and development practices

Bitwise Inc.
Sr. Software Developer/Consultant

FEB-2005 - JUL-2015 Chicago, IL

- Re-engineered a monolithic C/C++ system in Java using OOD design principles
- Architected backend micro-services to support digital marketing campaigns
- Analyzed discrete datasets & generated key insights for leadership
- Successfully implemented numerous software & analytical projects using 'Agile' methodology working parallel with geographically dispersed teams

EDUCATION

Master of Business Administration (MBA)
Northern Illinois University

MAR-2015 - MAY-2018 Chicago, IL

Bachelor of Computer Engineering
Pune University, India

APR-2001 - JUL-2004 Pune, India
